User Login Flow

Login

If a user is logged into a social app account, and logs onto Splash.FM. If that user's account has been tied to their Splash.FM account, they will bypass sign-in

Enter Email Address

1.) Pings user with pop up to confirm correct address has been typed. Gives user ability to change address.

2.) confirms email address is not already registered and awaiting authorization

if it is registered user can resend account creation email

NOT MVP 3) If email has been registered by another user, offers user ability to contact SplashFM

Click Social Connect Button

FIRST USE: authorizes Splash.FM to rake information including email key associated with that social app account.

NO ACCOUNT

HAS ACCOUNT

Send Account Confirmation Email

Enter Password

Social App Key Linked to Splash.FM

user can use the site fully but will be unable to relogin unless they click the auth link in their email – account will expire in 10 days from inital login without cliking auth link in the email

SUCCESS

FAIL

1.) pop up tells user that no Splash account has been that matches that social app email. Asks user to either link an existing account or create a new account.
